July, 2022 / Vol 1

Recover outdated machines using Arduino for scaling up ESTEAM and green skills in VET students

Create an effective and repeatable model at the European level of teaching new tools and skills for VET students, recent graduates in scientific and technological fields and VET, to scaling up their skills in order to support employment and promote social cohesion within future society and world of work.

Co-funded by the
Erasmus+ Programme
of the European Union

ROMUAS PROJECT HAS STARTED!

On 24th and 25th of March 2022 in Spain - Valencia, the partners from Croatia, Romania, Italy, Portugal and Spain met for the first time during the project Kick-off meeting and started working together about how to start implementing the project activities under the expert guidance of the Romanian coordinator Colegiul National Unirea, hosted by ALPE (Asociación Empresarial L'alqueria Projectes Educatius SPAIN).

What's new on ROMUAS project:

1. Let's get started!
2. The project results
3. Work in progress

The image shows two overlapping documents. The top document is an agenda for a transnational meeting in Valencia on March 24-25, 2022. It lists activities such as 'Arrival of Partners in Valencia', 'Welcome of the participants', and 'Partners' presentation'. The bottom document is a Gantt chart for the period 01.02.2022 to 31.01.2023, showing the timeline for various project activities across months M1 to M10.

Hour	Activity	Responsible
9 ^h	Arrival of Partners in Valencia	ALPE
10 ^h	Welcome of the participants	All partners
11 ^h -12 ^h	Partners' presentation	CHU, ALPE, Co-Labor, Dugo, ITIS G, Project

Activity	M1	M2	M3	M4	M5	M6	M7	M8	M9	M10

3 project results!

During the project implementation period the partnership will work to develop 3 project results

PR1 Experts Program Toolkit

PR2 ICT Tool for Competence Assessment
PR3 Gamified e-learning Platform

Work in progress

Currently, the partnership is working in synergy to develop the first of project results, the Experts Program Toolkit. The objective of this Toolkit is to create a training material that provides the project's target groups with the knowledge and skills needed to modernize existing machineries in order to make them "smart" and more adapted to the nowadays requirements of the manufacturing industry: flexibility, friendly interfaces, ability to produce and customized products, etc. The first version of the Toolkit will be released soon and in its final version will be translated in Romanian, English, Croatian, Italian, Spanish and Portuguese language.
